# INTRODUCTION

To meet the challenges of creating a profitable, highly competitive with environmentally awareness business sector.

We are new and highly motivated company that excited to participate in world global trading.

Our company established in 2019. We are eager to face new interesting challenge in cocofiber & cocopeat industry.

Costumer satisfaction is our priority, by matching costumer needs and our product quality.

innovation is the key to success in penetrating a highly competitive global market.

Our latest innovation is **COCOPOT**, made from cocofiber and natural lateks which 100% natural and environmetally friendly. Bio-degradable and compostable. Cocopot can be a solution of reducing polution on the earth from excessive used of plastik pot.

Currently our product already used in several plant nursery for cocopeat and cocopot sell in both online and offline store.

## OUR WORKS

we process coconut waste into high quality, environmentally friendly products

## WORKSPACE

Our production facility for cocoblock, cocopot and cocofiber packaging were built in an private owned area of 1600m<sup>2</sup> that include office, warehouse dan drying area.

While coconut husk raw material storage and processing are were built on government land with land management cooperation agreement. The production area is 1500m<sup>2</sup>

## PRODUCTION TEAM

Our team consists of experienced experts who are assisted by a workforce of local residents.

Teamwork is the key to achieving optimal production results.

Maintenance of machines and equipment is carried out regularly to ensure smooth production process.

The availability of raw materials must always be maintained by getting suppliers from several places.

So that it can guarantee the achievement of the expected production targets

## OUR PRODUCT

### COCOPOT

Environmental friendly plantation pots, made from processed coconut fiber waste, with many benefits such as, **eco-friendly, biodegradable, durable, nutritious, breathable, affordable**, making cocopot as a best alternative for using of plastic pots.

### COCOFIBER BALE

Made from processed coconut fiber with strong properties, durable and flexible. The coconut fiber is mainly used to replace foam materials in beds, seat cushion , coir mattress, coir doormats, geo textile, plant box, soil erosion prevention, mattresses, car seats & sofas.

### COCOPEAT BLOCK

This is a cuboid coconut peat block made out of natural ingredients. It is used for germination of seeds, enriching the soil with nutrients, growing plants and for other gardening uses. It expands upon adding water to it. It helps to retain a high amount of moisture and is resistant to any bacteria or fungal growth

## LIST OF MACHINES
