

About Us

PT Aevumlab Herba Asia (AHA) was established in April 2016.

We sell plant-based superfoods and supplements (mostly Indonesian herbs) for natural wellness under the brand name HERBILOGY.

We have them in different product formats: extract powder, extract in capsules, herbs infused tea, and oil.

We work with 300+ farmers across archipelago to ensure sustainability of these herbs and educate natural wellness to our consumers, while of course, supporting our farmers and promoting our local plants!

Our products mostly are **BPOM** and **halal MUI certified**, and produced in GMP certified manufacturer as we want to offer the best quality supplements.

Please see website www.herbilogy.com and Instagram @Herbilogy for our complete product range.

Our thoughts

- We want to provide “next level herbal products”: extract, no sugar, dissolves well, and of course practical.
- We want to educate that “**minum herbal itu bagian lifestyle, ga cuma minum kalau lagi sakit saja**”
#jangantunggusakit

Vision And Mission

Vision

Becoming the source of high quality natural (herbs based) wellness superfoods and supplements at affordable prices but with next level quality.

Mission

1. Educating Indonesians on the importance of maintaining theirs and their family's health (to prevent is better than to cure) through:

- Holistic wellness education (lifestyle and food selection) to achieve the desired level of health.
- Inspiring others to make their own healthy food (tasty, easy, and simple with the common ingredients at home) through creative ideas of healthy and tasty recipes.

2. Educating Indonesians to consume more superfoods / Indonesian plant-based supplements

- This is to support the welfare of local Indonesian farmers and to promote Indonesian superfood plants which are rich in health benefits.
