# One stop solution for the best coconut products from Indonesia

Orfalandcoco is one of the projects of PT. Orfaland Universal Indonesia (Pvt. Ltd) which was held with awareness of the vast agricultural potential in Indonesia, especially the island of Sumatra, and based on our noble desire to participate in empowering the agricultural and plantation sectors which leads to increasing the welfare of local coconut farmers. From orfalandcoco we want to make this dream come true

## About Us

As an agrarian and maritime country, Indonesia is blessed with enormous land and sea wealth which is the strength of the Indonesian nation itself. Fertile land stretches from The Golden Island of Sabang Island to the Eastern Gate of the Archipelago of Merauke Island, as well as the sea that surrounds it.

And as Indonesians who are proud of this, we feel worthy to contribute. In this immense ocean of wealth, we have chosen to concentrate on a more specific product, namely coconut and all its derivatives.

We are here to increase the demand for quality coconut products at reasonable prices for farmers by bringing their products to the world.

We firmly believe, with increasing demand and our empowerment support, the welfare of local farmers will increase and become better, along with the quality of their products.

## Our Key Feature

### **Integrity**

For us, integrity is the quality of having a strong ethical principle, which followed at all times. Honesty and trust are at the core of integrity. Consistency in integrity is the key of our business.

### **Commitment**

Commitment is our promise or firm decision to do our business, where we will continue to provide the best to our customers as long as possible.

### **Quality**

In our mutual thoughts, quality is not just about offering a product or service that exceeds the standard, but it's also about the reputation we gain for consistently delivering a customer experience, that is "above and beyond".

### **Innovation**

Innovation means the creation, development and implementation of new products, processes or services with the aim of increasing efficiency and effectiveness to win the competition and gain customers satisfaction.

## Our Perspective

It's definitely not hard to find some repentances circumstances and often occurs in almost of all on these potential areas, where farmers rather find the situation's difficult to sell their harvesting product, because the market is rather unreachable by them privately.

We also care about the issue which often faced by coconut farmers, specifically the low selling price. This situation occurs due to many factors, one of which is some domestic buyers who are not transparent. This results the farmers who don't know the market yet have no choice but to sell their crops to an amoral people as the buyer.

This condition can be the cause for the lack of skills and abilities of the farmers in processing and upgrading their products, and we wanna fix it. The declining quality of the products will certainly be very detrimental to the farmers themselves.

## OUR PRODUCTS

### **Semi Husked Coconut**

We proudly present one of Indonesia's finest natural resources. Freshly hand-picked within 60 days, almost entirely light brown colored, enriched by the sweetness and thickness of coconut flesh; are some of the portrayals of our superior commodity, especially in Sumatera Island

### **Copra**

Copra is the desiccated flesh of carefully selected fresh coconut. The selected ripe coconuts split into two, continued by drying them under the sun to detach them from their shells, arranged on special shelves for the final drying process afterward. Until lastly packed and ready to be produced as materials for various advanced products

### **Coconut Fiber**

Coir is a natural fiber formed by the outer part of the coconut shell, The fibrous material can be seen between the hard shell, the inner part, and the outer layers of coconut

There are two types of coconut coir that possess different usages:

- Brown Coconut fiber Produced from ripe coconut, this fiber can be utilised as a material for upholstery, sacks, and horticulture
- White Coconut Fiber Produced from raw coconut, one is used to make fine brushes, fishing nets, and lastly ropes.

## OUR PRODUCTS

### **Crude Coconut Oil (CCO)**

Crude Coconut oil is the raw coconut oil made of Copra extraction; these mature dried coconut flesh must be further processed to be applicable for usage in the food, soap, cosmetic and oleochemical industries

### **RBD Coconut Oil (RBD-CNO)**

Is the refined version of Crude Coconut oil that is suitable for consumption. RBD CNO is a bright yellow liquid and is semi-solid under room temperature. These kinds of coconut oil are used for food processing and in the oleochemical industries. CNO is relatively more resistant towards high temperatures, therefore lasts longer, and is hard to be blackened during the cooking process

### **Virgin Coconut Oil (VCO)**

Is an oil that is extracted purely from fresh coconut milk, processed through significantly different stages from the other coconut oil, also smelled of pure fresh coconut water. Although mainly the content of coconut oil has no difference compared to VCO, this product has more advantages, one of which is vitamin E which works best for facial and skin care. VCO is also suitable for consumption; noticing this product is free of trans fat and not hydrogenated

## OUR PRODUCTS

### Desiccated Coconut

Desiccated Coconut is obtained by drying the granulated or shredded white meat of the fresh mature coconut kernel. It should be suitably processed for human consumption.

Desiccated Coconut using the aqueous process by pressing the meat to obtain coconut cream before drying shall be classified as low fat desiccated coconut.

Desiccated Coconut is classified for the purposes of commercialization into three types according to the granulometry of the product as follows:

- Extra-fine desiccated coconut
- Fine desiccated coconut
- Medium desiccated coconut

### Coconut Milk & Cream

Coconut Milk and Cream are made by boiling the coconut meat with water. As might be expected, the difference between milk and cream is in the concentration and consistency.

- Coconut milk has the liquid consistency of cow's milk and is made from simmering one part shredded coconut in one part water. Coconut milk is the basis of most Thai curries.
- Coconut cream is much thicker and richer. It is made from simmering four parts shredded coconut in one part water. The cream that rises to the top of a can of coconut milk is also considered coconut cream.

### Organic Coconut Sugar

Coconut sugar is the crystallized nectar of the coconut palm tree blossom that (*Cocos nucifera*) made by a simple boiling, cooling, and grinding process. It has been used as sugar in South-East Asia for many centuries, most particularly in Indonesia. Our Organic Coconut Sugar is made by a community of traditional coconut farmers in Indonesia and processed naturally which there is no chemicals and preservatives added.

Our organic coconut sugar is the crystallized nectar of the organic coconut palm tree blossom (*Cocos nucifera*).

## OUR PRODUCTS

### **Coconut Milk Powder**

Coconut Milk Powder is manufactured by spray drying natural coconut milk. It is finely textured and delivers the aroma and flavour of freshly-squeezed coconut milk in a convenient, easy-to-use pack. Does not contain any preservatives, artificial flavouring or colouring and is gluten free. Quality the advanced spray drying technique and hygienic packaging ensure ultimate freshness of flavour and taste.
