About Us

DIGIS GLOBAL GRACIA supply across the globe as the leading supplier for Coffee product from Indonesia which is well known as the biggest and the best in the world.

We produce high-quality coffee by applying sustainable and ethical sourcing. Partnering directly with the farmers makes us more aware and responsive about anything happening at the farm level, because our goal is to consistently improve our coffee quality by not neglecting our farmers' livelihood.

Indonesia has a great deal to offer the specialty market, with distinct and unique profiles depending on region and processing. Most notably, offers specialty coffees from Sumatra & Java; however, the country's other islands of Sulawesi, Flores, Bali and Papua also produce coffee

Vision:

The best Coffee Product supplier from Indonesia for Global Market

Market Positioning :

1st Indonesia Coffee Product Supplier with mission to empower society in Indonesia's Small and Medium Enterprise

Unique Value Proposition :

Treat Client and Stakeholder as part of Big Family which put Integrity as top priority

Our Priorities

INTEGRITY

The truth is on top priority, keeping our word and treating others with fairness and respect. It must not be compromised for any kind of reason

QUALITY

We committed for being suitable for its intended purpose while satisfying customer expectations

COMMITMENT

We consistently provide the best to our customers and stakeholder at all the time. Our opportunity to serve should be viewed as a privilege that is not to be taken for granted.

INNOVATION

Continuously inventing, designing, developing products and services to coupe the need in the marketplace

ABOUT ARABICA & ROBUSTA BEAN

Green coffee cherries *Coffea Arabica*, known as Arabica coffee, accounts for 75-80% of the world's production. *Coffea canephora*, known as Robusta coffee, is more robust than the Arabica plants, but produces an inferior tasting beverage with higher caffeine content.

The coffee plant can grow to heights of 10 meters, if not pruned, but normally the trees are pruned to a reasonable height for easy harvesting. Coffee trees flower twice a year. In Sumatra the season runs from November to January and in Java from late July through to September.

The flowers grow in bunches that hang from the tree. Only about 25% of the flowers will grow into coffee cherries. The Arabica species is self-pollinating, whereas the Robusta species depends on cross pollination. After pollination the fruit remains almost dormant for 6-8 weeks. After this time the cherry starts its rapid growth stage where it goes from the size of a pin head to the final cherry size within a 15-week period.

ARABICA BEAN

Arabica coffee is the one with more flavor, nuances, less acidity, and less bitterness.

It's a very mellow and mild coffee. It's also got only half the caffeine of Robusta beans, but double the amount of natural sugars and fats, which help develop those flavors Arabica is famous for.

ROBUSTA BEAN

Robusta, however, has a stronger, harsher taste, with a grain-like overtone and peanutty aftertaste.

They contain twice as much caffeine as arabica beans, and they are generally considered to be of inferior quality compared to arabica.
