FOREWORD

Coffee is an important type of beverage for most people around the world. Not only because of the enjoyment of coffee drinkers but also because of the economic value for countries that produce and export coffee beans (such as Indonesia). To some this product, made from the roasted beans of the coffee plant (a flowering plant of the Rubiaceae family), is referred to as the second most legally traded commodity in human history.

The coffee sold in the world is usually a combination of roasted beans from two varieties of the coffee tree: arabica and robusta. The difference between these two varieties mainly lies in their taste and caffeine levels. Arabica beans, which are more expensive on the world market, have a milder taste and have 70% lower caffeine content than robusta beans.

Indonesia is included in the top five largest coffee producing countries in the world. Coffee from the country has also been widely known by coffee connoisseurs from all over the world. The Central Statistics Agency (BPS) noted that in 2020 the value of Indonesian coffee exports reached US\$ 809.2 million and we are here to bring Indonesia's finest coffee to your place. Indo Coffee is a strategic business of PT Asia Exim Global which focuses on trading coffee beans. Our vision is to become one of the leading coffee producers that customers trust in terms of quality, traceability, sustainability, quality and consistency. We realize this vision by forming a solid team, standardizing processes, setting up infrastructure and implementing technology.

Brought up so close to coffee in one of the largest coffee producing countries in the world, starting from North Sumatra, Medan City, Berastagi City and Binjai City, has encouraged Tubagus Robby who is the Founder and CEO of Indocoffee – Indonesian Finest Coffee Exporter to start his business. His love for coffee has driven the coffee trading business not only in the local market but also in the global market, to bring the perfect taste of Indonesian finest coffee to the world and to preserve the coffee heritage and for the welfare of Indonesian coffee farmers.
