

INDONESIA'S FINEST

SORGHUM GLOBAL

PT GENERASI BERKAT INDONESIA

ABOUT US

PT Generasi Berkat Indonesia (PT GBI) is an Indonesian based company, specialising in Agriculture- Sorghum.

Founded in 2022, PT GBI aims to export the finest Sorghum, with 2 variants- RED and WHITE Sorghum.

Our sorghum is sourced from Java. Due to its location in the dry mountainous area, this makes Java to be a perfect area to plant Sorghum.

Operation

WHY SORGHUM?

Sorghum grain is a multi-purpose, from animal feed, to fermentation material or even as healthier rice-substitution and gluten free carbohydrates.

Sorghum is also an easy maintenance plant, so its more likely to survive changing weather climates, especially drought.

When its dried properly with moisture content less than 14%, sorghum can easily be stored for up to a year and even more.

VARIETY

Main 2 major of Sorghum available in Indonesia are:

- RED Sorghum
- WHITE Sorghum

Our sorghum is harvested from the field, dried for 4-5 days to minimise the moisture and finally sifting out the grains.

PRICING

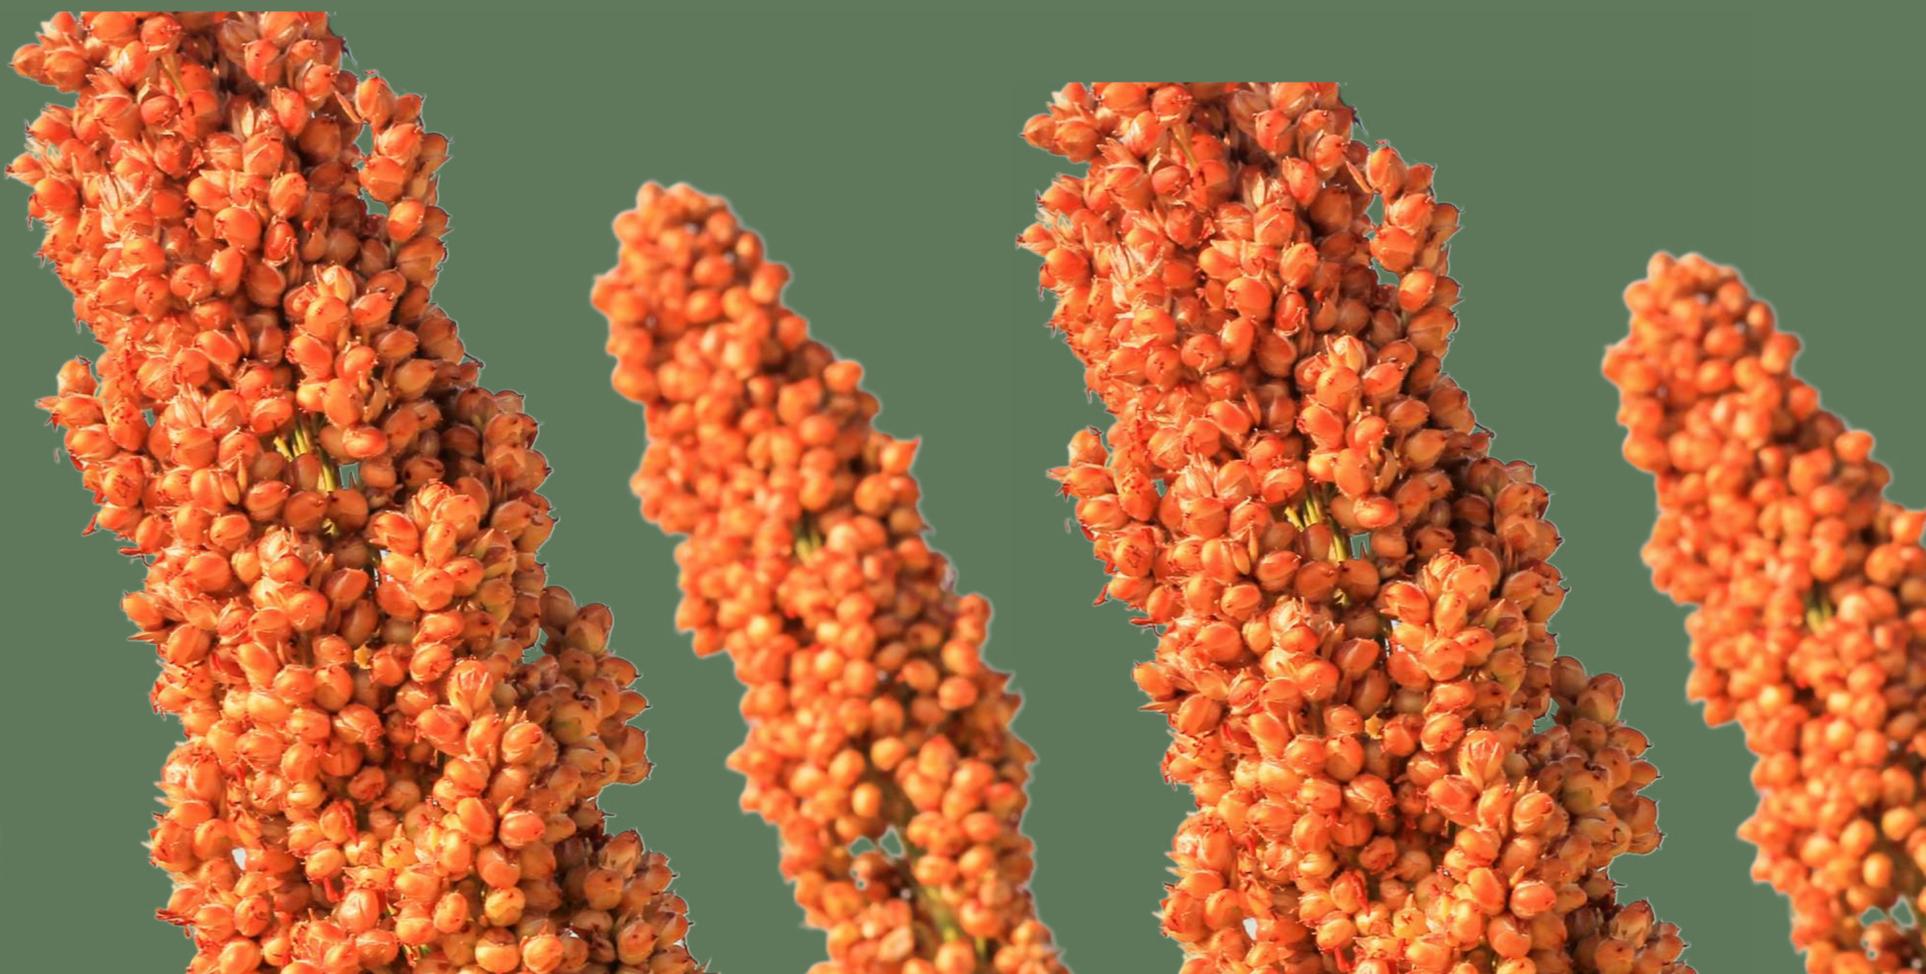

Sorghum pricing is based upon market price.

The more expensive variant sorghum is the sweet variety, this is because it is harder to grow due many birds are attracted to eat it.

We can provide FREE SAMPLES so you can check out Indonesia's quality of Sorghum.

Do reach out to us to find out the latest Sorghum pricing. Generally there are 3 types of export pricing:

- Less than a Container Load (LCL)
- 20 Feet Container Load (20 Feet)
- 40 Feet Container Load (40 Feet)
