Condition	No sprouts or cracks
Packaging	Plastic straps with wbole around 100 - 150 kg (220 - 330 lbs)

COPRA

SPECIFICATION

Typically split into two halves, **copra** is the dried meat of a mature coconut from which coconut oil is extracted for a wide range of applications. We carefully handpick **fully mature coconuts at its finest** to produce the best quality copra and carry out both sun and oven drying to keep the moisture content to a minimum. Our copra is available in edible, regular and mixed grades. There three varian of Copra are :

- Edible (White Copra)
- Regular
- Mixed/Smoked

COCO FIBER

SPECIFICATION

Coconut fiber is a coarse fiber extracted from the fibrous outer shell of a coconut. It is one of the few natural fibers that is **water-proof** and **resistant to damage** by salt water. Due to its excellent properties, coconut fiber is used in a wide range of industrial applications such as mats, brushes, mattresses, automobile dashboard, insulation and packaging. Our coconut fibers are of **high quality** and carefully dried to achieve a relatively **low moisture content** of below 15%.

If you need about detail product, please visit us at www.juancoco.com

COCO PEAT

SPECIFICATION

Cocopeat is a co-product of coconut fiber extraction process. It is a non-fibrous, spongy, lightweight and corky material that holds together the coir fiber in coconut husk. Depending on the electrical conductivity, our cocopeat is available in High EC and Low EC.

High EC Cocopeat (unwashed) is commonly used in animal bedding farms due to its **superior ability to absorb moisture** and **soft-bed cushioning** properties. Our high EC cocopeat is free from fine dust particles and easy to lay and remove. It is also sterilized to prevent molds, pathogens and bad odor due to long term use. High EC Cocopeat has a relatively high salt content and hence it is not suitable to be used as growing mediums.

Low EC Cocopeat (washed) is highly considered an **ideal, multi-purpose growing medium** in horticulture and floriculture due to its **natural rooting hormones**, **antifungal** properties and **low salt** content. It is an excellent alternative to traditional peat moss and rock wool not only because it is very easy to use and inherits all the characteristics of high quality growing mediums that can be **used in a wide range of plants**, but also **100% organic, renewable** and produced without causing any environmental damage. Our low EC cocopeat is first sieved, washed, dried and finally compressed into blocks. Once expanded, one kilogram of compressed cocopeat is equivalent to 15 liters of moist cocopeat.

BRIQUETTES

SPECIFICATION

Our briquettes are made of premium **100% natural coconut shell charcoal** to elevate your shisha/hookah experience. They have **light beautiful white ashes**, consistently **high calories** and **long burning time**. **No smoke, no sparks, no odors** and **burn evenly** across the surface at high heat with a hot burning color. Made of 100% coconut charcoal from the top plantations in Indonesia, our briquettes **do not leave any aftertaste** in your throat. They are the **healthiest, cleanest** and **most environmentally friendly** form of charcoal to date. Available in various sizes and shapes such as cubic, cylindrical, hexagonal, flat/brick.

Grow Your Business with Our Private Label/OEM Service
We understand that every market is different and every business is unique. If you have custom specification requests in terms of shape, size, mixture, packaging etc, please [contact us](#) to discuss more details. We will **work together with you** to create the perfect charcoal products for your market, right from choosing raw materials to final packaging. **Your brand, your packaging, our factory.**

DESICCATED COCONUT

SPECIFICATION

Desiccated coconut is grated, dried and unsweetened fresh meat of mature coconuts, commonly used in bakery, confectionery and other food products. Our desiccated coconut is made of the **freshest, finest coconut meat** free of pesticides and heavy metals. No sweeteners or additives. It has a clean white color, free from impurities and retains the naturally **pleasant coconut taste and fragrance** that readily increases appetite. **Highly nutritious** with very **high fiber** content. Depending on the fat content, our desiccated coconut is available in **High Fat** (Medium and Fine grains) and **Low Fat** (Extra Fine and Fine grains).

VIRGIN COCONUT OIL

SPECIFICATION

Odor	Light coconut fragrant
Taste	Free from rancid or sour taste
Color	Colorless
Moisture	≤ 0.1%
